

Freedom Preparatory Academy Asbestos Statement

The Asbestos Hazard Emergency Response Act (AHERA) requires schools to ensure that workers and building occupants or their legal guardians are informed at least once each school year about inspections, response actions, and other activities related to asbestos in the school.

General Information on Asbestos

Asbestos is a naturally occurring fibrous mineral that is mined from the earth, and added to certain products including building materials such as floor tiles, piping insulation, plaster, or other building substrates. It was widely used in building materials in the past for its superior insulation properties, fireproofing properties, and the ability it has to strengthen and add longevity to building substrates.

Inhalation of asbestos fibers has been shown to have serious health risks such as Asbestosis, Lung Cancer, and Mesothelioma. These diseases can be a consequence of asbestos exposure, however, symptoms may take many years to develop.

It should be noted that building occupants are only at risk to asbestos exposure when building materials containing asbestos are disturbed or damaged. When materials that contain asbestos are intact, the asbestos fibers remain dormant in the substrate. Damage or disturbance to these materials can cause a release of asbestos fibers that can lead to exposure. For this reason, the condition and locations of known or assumed asbestos containing materials is checked periodically to ensure appropriate response actions to any damage or disturbance to building materials thought to contain asbestos.

Asbestos at Freedom Preparatory Academy school buildings

Currently there are no known materials containing asbestos in any of our campus buildings.

Asbestos Management Plan

This constitutes the written Asbestos Management Plan documentations, inspections and surveillance activities, known and presumed asbestos containing materials in the building. Records of asbestos-related building material disturbances and response activities, and post-response documentation as required by the state of Utah. The Asbestos Management Plan is located in the policy section of the schools website and is available for review by parents, legal guardians, and teachers and other school personnel, representatives of EPA, representatives of the State, and the public.

By Federal and Utah State regulation Freedom Preparatory Academy is required to inform parents, teachers and employees of our asbestos policy which states, "At the beginning of each school year we will notify parents, teachers, and employees of the availability of the management plan."

"Our facilities have been certified to be asbestos free. " If you have any questions or concerns, please contact Mr. Chris Helvey at Chelvey@freedomprep.net or call 801-437-3100

The management plan and Asbestos statement will be printed in the parent student handbook as well as our employee handbook beginning school year 2016-2017. A copy of the parent student handbook can be found on the school website.

Re: Freedom Academy

Dear Lynne,

No asbestos containing materials were specified or shown in any details or drawings for the above referenced project. To the best of our knowledge no asbestos containing materials were used in the construction of the building.

Sincerely,
VCBO ARCHITECTURE, LLC
