Amended: none

## Teacher Incentives Policy

Policy No. 24

---

Beginning in August 2012, each teacher will be required to write at least one grant per year. This grant must be educationally related, whether it is for a single classroom or grade level, a specific student audience, school-wide enhancement or for professional growth. Group grant work must be approved by the administration in order for each individual to qualify for yearly grant writing credit.

Beginning in August 2012, regardless of the type, amount or kind of grant, the school will award the teacher or team with 10% of the total value of each grant awarded during the school year.

To encourage the skill and participation in continual grant writing, a teacher with the greatest grand total value of grants awarded during a single school year will receive a bonus package to be determined by the administration. Packages will not be solely monetary.
